

NIBP-B-MRI & RXNIBP-A-SENSOR

NONINVASIVE BLOOD PRESSURE MEASUREMENT IN THE MRI

The NIBP-B-MRI measures relative central arterial pressure in the MRI to provide continuous, noninvasive "Beat-by-Beat" Blood Pressure from at rest humans (≥ 15 kg). Measures include Diastolic, Systolic, Mean Arterial Pressure; heart rate (HR) data is available. The system uses the scientific method of Pulse Decomposition Analysis ("PDA").

Key Features

- Continuous, noninvasive monitoring of "Beat-by-Beat" Blood Pressure (Diastolic, Systolic, Mean Arterial Pressure) and Heart Rate
- Wireless transmission of blood pressure data from VitalStream blood pressure processing unit (via Bluetooth) to a PC—tablet included
- Measurements captured using a single disposable finger cuff inflated to low pressure—can be worn for extended periods with no discomfort or loss of circulation in the finger
- Designed for use with MRI recordings
- easily export to Acq*Knowledge* research software for post-acquisition analysis
- Compact device with on-board display
- Automatic and manual calibration modes
- Integrated PDF report generation and alarms

System Components

- MRI-Compatible "VitalStream" Continuous Monitor
- Finger Cuff Transducers x 2
 - In general, Cuffs last ~100 hours of intermittent MRI use (max 3-5 days of continuous use)
 - additional or replacement sensors available as <u>RXNIBP-A-SENSOR</u>

- Tubing 8 m (25')
- Tablet computer
- Automatic Blood Pressure Calibration Unit

Updated: 8.12.2024

- Export Utility
- Bluetooth dongle
- Power Supply
- 1-Year Warranty

PRODUCT SHEET

MRI Use: MR Conditional (NIBP-B-MRI only)

Unit remains in the control room and tubing passes through the waveguide to subject. Condition:

Calibration

VitalStream devices can be calibrated automatically using its self-calibration mode or manually with an included cuff. An export conversion utility is included to import calibrated pulse wave data to Acq*Knowledge* research.

Compatibility

MRI and fMRI setups

NIBP-B-MRI Technical Specifications

Physical Specifications:			
Device Dimensions:	3.4 x 6.4 x 9.6 cm		
Weight:	198 Grams		
Operating & Storage Conditions:			
Storage Temp:	-20 °C to +70 °C		
Operating Temp:	0 °C to 40 °C		
Operating Humidity:	0 to 95% non-condensing		
Operating/Storage Pressure:	70 – 101 kPa		
Operating/Storage Elevation:	0 – 3000 meters		
Operating System Pressure:	-10 mmHg to +250 mmHg		
Infection Control:	Wipe with Super Sani-Cloth or other disinfectant wipe		
Liquid Ingress Rating:	IP52		
Parameter Measurement Ranges:			
Heart Rate Range:	30 – 200 BPM		
Heart Rate Resolution:	1 BPM		
Heart Rate Accuracy:	±3 BPM		
Heart Rate Averaging:	10 second moving average		
Continuous Noninvasive Blood Pressure Method ("CNIBP"):	Pulse Decomposition Analysis ("PDA")		
CNIBP Systolic Range:	80 – 250 mmHg		
CNIBP Diastolic Range:	50 – 150 mmHg		
CNIBP MAP Range:	60 – 185 mmHg		
CNIBP Accuracy:	±5 mmHg, Std, dev. < 8 mmHg		
CNIBP Calibration:	Automatic (oscillometric sweep via finger cuff) or Manual (user input parameters)		
CNIBP Recalibration Update Interval:	User configurable		
CNIBP Measurement Update Interval:	User configurable and fixed intervals (0 seconds to 15 minutes)		
Respiration Range:	6 – 32 breaths/minute		
Respiration Accuracy:	±3 breaths/minute		
Respiration Method:	Proprietary PDA, IBI, spectral analysis		
User Interface Information:			
Integrated Liquid Crystal Display:	128 x 128 pixels		
Clinical App Tablet Based Display:	8" diagonal LCD (Caretaker provided hardware)		
Waveforms Displayed:	Continuous pulse rate, continuous pulse pressure, individual pulse shape		
Audible Alarms:	None		
Battery & Charging Information:			
Battery Type & Certification:	2000 mAh lithium polymer UL certified		
Operating Time:	8 – 24 hours, depending on use mode		
Charging Time:	2 – 4 hours using provided wall charger		
Charger Type & Certifications:	5 VDC barrel jack, UL, IEC		
Charger Current & Voltage:	150 – 400 mAh @ 5 – 12 VDC		
Communications:			
Bluetooth Frequency:	Bluetooth Low Energy ("BLE"), 2400 – 2483.5 mHz ISM band		
Bluetooth Communications Range:	10 meters line of sight from host/display		

PRODUCT SHEET

Security Encryption:	AES 128-bit encrypted data stream			
Disposable Finger Cuff & Wrist Strap:				
Finger Cuff Dimensions:	3.8 mm x 14.2 mm			
Finger Cuff Diameter Range:	12 – 30 mm			
Wrist Cuff Dimensions:	346 mm x 38 mm			
Cuff Materials:	Hypoallergenic polyurethane			
Cuff Infection Control:	Single use only, dispose after each use

RXNIBP-A-SENSOR

This is a 5-pack of 8 m Finger Cuff Sensors for MRI Research with the NIBP-A-MRI and NIBP-B-MRI Systems.

Sensor life: ~100 hours of intermittent MRI use Finger Cuff Dimensions: 3.8 mm x 14.2 mm Finger Cuff Diameter Range: 12 mm - 30 mm

Tubing: 8 m

Interface: NIBP-A-MRI and NIBP-B-MRI Cuff Materials: Hypoallergenic polyurethane

Cuff Infection Control: Single use only, dispose after each use

(Non-FDA Cleared)
